NEWS FROM RANCHO SANTA FE TECHNOLOGY

RANCHO SANTA FE TECHNOLOGY COMPLETES MOVIE STUDIO DATA CENTER UPGRADE

Rancho Santa Fe Technology announced the successful completion of the Data Center Upgrade Project at DreamWorks SKG Studios in Glendale, California. The overall project consisted of the removal of a Mass Filing System that occupied a portion of the Data Center and completing upgrades to the Mechanical Systems, including Chilled Water and HVAC, Electrical and Fire Suppression Systems, Raised Floor and architectural finishes.

Among the many challenges that faced Rancho Santa Fe Technology was the need to complete the work without disrupting the surrounding Data Center operations. DreamWorks Animation's ability to make movies depends on their data center being operational 7 days a week, 24 hour a day. One of the principal challenges was replacement of the existing 18 inch raised floor with new code compliant seismic bracing while each row of computer equipment was operational.

Downtime was not an option and every task was planned to make sure that there was zero downtime during construction. *"Rancho Santa Fe Technology was able to successfully avoid any downtime at all by their careful attention to detail and flawless execution,"* according to Joe Dawkins, Dreamworks' I.T. Director.

About Rancho Santa Fe Technology, Inc.

A leading communications contractor in the western states, Rancho Santa Fe Technology is headquartered in San Diego. The firm specializes in installation, maintenance, repair, and upgrade to computer networks and their equipment. It is focused on providing customers with an essential suite of services in interrelated areas; providing service level maintenance and repair contracts for distributed network products for both wide area and local area networks (WANs and LANs) and building connectivity through the implementation of voice/data structured cabling and the roll-out of new enterprise wide data equipment technology. The company was named one of the "25 Top Emerging Technology Companies" in San Diego and received the "Anderson Award for exceeding customer expectations". The telephone number is 858-565-7224.
