NEWS FROM RANCHO SANTA FE TECHNOLOGY

RANCHO SANTA FE TECHNOLOGY COMPLETES FOLEY & LARDNER OFFICE UPGRADE

Foley and Lardner, one of the nation's largest and most reputable law firms, chose Rancho Santa Fe Technology to install a structured voice and data cabling system as part of their major remodel of the San Diego office. Rancho installed 90,000 feet of Category 6 cable to nearly 400 workstations throughout the firm's 4 floors at 402 West Broadway. Prior to this, temporary workspace was cabled on a fifth floor for use during construction.

As well as the voice and data cabling, Rancho Santa Fe Technology interconnected the floors with fiber optic cable and voice trunk. Additionally, Rancho constructed a new Main Distribution Frame (computer room) and Intermediate Frame rooms on each floor. Wireless Access Points, Audio-Visual connections, and a new paging system completed the requirements.

About Rancho Santa Fe Technology, Inc.

A leading communications contractor in the western states, Rancho Santa Fe Technology is headquartered in San Diego. The firm specializes in installation, maintenance, repair, and upgrade to computer networks and their equipment. It is focused on providing customers with an essential suite of services in interrelated areas; providing service level maintenance and repair contracts for distributed network products for both wide area and local area networks (WANs and LANs) and building connectivity through the implementation of voice/data structured cabling and the roll-out of new enterprise wide data equipment technology. The company was named one of the 25 Top Emerging Technology Companies at the annual StarCom 2000 event in San Diego and received the 1999 Arthur Anderson Award for exceeding customer expectations. The telephone number is 858-565-7224. Visit the company's website at www.rsft.com.
