NEWS FROM RANCHO SANTA FE TECHNOLOGY

RANCHO SANTA FE TECHNOLOGY COMPLETES SERVER ROOM UPGRADE FOR HOMES.COM

Rancho Santa Fe Technology announces the successful completion of the main Server Room facility for Homes.com. The overall project consisted of consultation, design, and installation of data equipment racks with seismic bracing and installation of a new APC rack design, UPS system and battery array.

Server Room climate control was accomplished with the inclusion of a new Liebert DataMate CRAC (computer room air conditioning) unit which was installed in a live data center and office environment.

“Rancho Santa Fe Technology completed this critical installation on time and without disruption by paying attention to the little things that are so easily overlooked.”

According to Carlos Martinez, Homes.com’s IT director.

Homes.com is an on-line real estate services firm and is headquartered in San Diego, CA. They provide a wide range of products and information for home buyers, sellers and real estate professionals. It is a subsidiary of Trader Publications

About Rancho Santa Fe Technology, Inc.

A leading communications contractor in the western states, Rancho Santa Fe Technology is headquartered in San Diego. The firm specializes in installation, maintenance, repair, and upgrade to computer networks and their equipment. It is focused on providing customers with an essential suite of services in interrelated areas; providing service level maintenance and repair contracts for distributed network products for both wide area and local area networks (WANs and LANs) and building connectivity through the implementation of voice/data structured cabling and the roll-out of new enterprise wide data equipment technology. The company was named one of the 25 Top Emerging Technology Companies in San Diego and received the Anderson Award for exceeding customer expectations. The telephone number is 858-565-7224.
